Health is Global: Proposals for a UK Government-wide Strategy

A report from the UK's Chief Medical Advisor, Sir Liam Donaldson, 'Health is Global: Proposals for a UK Government-wide Strategy' makes the case for developing a global health strategy, one that will benefit the health of the UK population and those in the rest of the world.

Attached is a summary report that was published in the Lancet in March 2007, which describes the rationale and process for developing the new UK Government-wide strategy for global health and highlights some of the issues that must be discussed. Also attached is a letter from Sir Liam Donaldson, inviting thoughts and comments on the report.
