

Paper for Discussion: Maternal and Child Nutrition early life draft report

Agenda Item: 4

The draft report is being circulated for discussion and comment.

The draft report has previously been forwarded to the Child and Maternal Nutrition subgroup for comment. The responses from the group have not as yet been incorporated but will be tabled at the meeting.

This is work in progress and therefore will not be made publicly available as it is in draft form. The revised draft will however be made available for public comment after the drafting stage and before going to the committee for final agreement.
