

Paper for agreement

Agenda item: 2

Folate and disease prevention: an update

This draft paper has been amended following discussions at SACN in October 2005 and by the Subgroup on Folate in February 2006, who considered responses received from stakeholders. A summary of stakeholder comments can be found at www.sacn.gov.uk. The Committee is asked to agree the draft report. It should be noted that there still remain some editorial changes that need to be made and the report will not be made available on the website at this stage because of the imminent publication of the report.
